DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 11-13, 17 and 45-54 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 11, in lines 2-6, the phrase "...one or more dielectric layers comprised of latex; and one or more layers of electrically conductive material..." is unclear.

If there is only one dielectric layer (claim 11, line 2) in the circuit, claim 11 would be unclear because it discloses more than one dielectric layer (claim 11, line 6). It is also unclear how one dielectric layer would support a plurality of layers of electrically conductive material if there is only one dielectric layer and a plurality of layers of electrically conductive material in the claim.

Claim 11, line 5, the phrase "electrically conductive layer" is unclear whether it is being referred to the layer of electrically conductive material.

Claim 17, in lines 4-11, the phrase "...one or more flexible dielectric layers comprised of latex; and one or more of electrically conductive material..." is unclear.

If there is only one dielectric layer (claim 17, lines 4-5) in the circuit, claim 17 would be unclear because it discloses more than one dielectric layer (claim 17, lines 10-11). It is also unclear how one dielectric layer would support a plurality of layers of electrically conductive

material if there is only one dielectric layer and a plurality of layers of electrically conductive material in the claim.

The specification (fig. 38) discloses one layer of electrically conductive material can be patterned to form multiple electrical interconnects between bonding pads on different ones of the integrated circuits, with the other layer of electrically conductive material formed below the one layer of electrically conductive material. It is unclear how one layer of electrically conductive material is able to accomplish the connection in claim 17 (lines 6-11).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
